

Aqua SCAT 2 Waterborne Degreaser

1391, 1394

Transtar's Aqua SCAT 2 Waterborne Degreaser is a specially formulated, water-based degreaser that can be used on all plastics, metal and pre-painted parts. Its unique mix of alcohol, surfactants and water make it ideal for cleaning and degreasing plastics prior to painting or priming. It also reduces the amount of dust contact by neutralizing static charge. Compliant across North America.

Mix Ratio

Ready to use

Suitable Substrates

- Raw plastic - rigid (SMC, BMC)
- Raw plastic - flex (ABD, PPO)
- Raw plastic - soft (PUR)
- Plastic part - primed
- Fiberglass/SMC Gel Coat
- Bare steel
- Bare galvanized
- Bare aluminum
- Self-etch primer
- All OEM finish & old paint work
- 1K primer
- 2K primer
- Body filler
- OEM E-Coat

Note: Due to the diverse nature of plastics, always test plastic substrate for acceptable adhesion. Adhesion promoter maybe required for proper adhesion.

Note: Test pre-primed panels with acetone or paint thinner. If coating fails, strip panel to bare plastic & follow SOP 251 for Raw Plastic.

Surface Prep & Application

Apply Aqua SCAT 2 to surface prior to grinding, sanding or painting to prevent contaminants from being worked into the substrate surface. Spray or wipe on substrate. Wipe off with LINT-FREE cloth.

Note: Re-wiping (i.e. with tack cloth) after using Aqua SCAT 2 may increase static. Aqua SCAT 2 can be used in your current multi-step process as a degreaser. It can also be used as a one-step process as an anti-static and degreaser.
